# Highlights from the Show

## STAIRWAY Bienville Custom Framing

In their efforts to dress up the home's entry stairwell, designers Alex Lavergne and Bill Roberts aimed for "a clean and simple look with an elegant feel." A series of botanical prints in muted gold frames add interest to the stairwell; and complement while not competing with the bold design of the adjacent entry foyer.

## ENTRANCE FOYER Ty Larkins Interiors

An entry foyer "provides the perfect opportunity to make a bold design gesture," say designers Ty Larkins and Michelle Dupre. Here, they add, "the idea was to add excitement." A graphic black and white floor covering is the foundation for elegant furnishings with modern sensibility. Over the Richard Mishaan console table hangs a large "ancestral" painting by Tony Mose ornately framed in white. Additional accessories in white and shocking green are contrasted by the soft blue wall color. A series of gilt art frames flank the portrait and add visual interest.
